

The special investment material  
for lithium disilicate ceramics.

The investment material specially  
developed for the processing of  
lithium disilicate glass ceramics helps  
guarantee:

- Perfect surfaces
- Minimal reaction layer formation
- Detailed reproduction of pressed  
objects
- Consistent expansion values  
through strict quality control

## CONCEPT VEST™ powder

The special investment material  
For lithium disilicate ceramics.

25 x 100 g

Item No. 898/2066

50 x 100 g

Item No. 898/2065

## Zubler® Investment Liquid

1 Liter

Item No. 898/204

## Zubler® Disposable Plungers

For all pressable dental ceramics  
and **Lithium Disilicate**.

Excellent quality and precise dimensions help guarantee  
consistent press results in rings of all sizes. Multiple  
diameters and lengths are available for all modern pressing  
processes.

ø 12 mm

Item No. 20/0235

**ø 13 mm**

**Item No. 20/0238**

ø 16 mm

Item No. 20/0237

## Zubler® Flexring Systems for Lithium Disilicate Ceramics & all Pressable

The interior surface extrusions (ribs) of the ring ensure faster heat  
absorption and faster cooling. Sector lines make it easier to find the  
press object, and damage during divesting is virtually impossible. The  
Flexring is easy to clean and has a long life.

(Sprue base, Leveling top & Flexring former for Lithium Disilicate)

100g Ring System

Item No. 20/0228

200g Ring System

Item No. 20/0229

## VARIO BALANCE

Precise dosing for the demanding laboratory!  
For investment, gypsum, and more! 10 x more  
accurate than using graduated cylinders!

- 200 customizable programs
- Quick and easy operation
- Reliable, consistent results
- Extremely low error rate (max. 1%)

Item No. 898/420
