

Installation guide rectangular pipe R1000

The fixed rectangular pipe R1000 consists of a 80x30mm aluminum pipe which is sealed on one side.

The vacuuming hose of the suction unit is simply plugged onto a downward facing plastic connector suitable for hose diameters from 35 to 40mm.

Drawers below the rectangular pipe may not be longer than 370mm. The mounting points are compatible to standard Freuding mounting points. (1 inch = 24.5 mm)
