

Installation guide rectangular pipe R1300

The "pull out" rectangular pipe R1300 consists of a movable 80x30mm aluminum pipe which is cased in a metal housing. The vacuuming hose of the suction unit is simply plugged onto a downward facing connector suitable for hose diameters from 35 to 40mm. Drawers below the rectangular pipe may not be longer than 380mm. The mounting points are compatible with standard Freuding mounting points. (1 inch = 24.5 mm)
